

Milan 2.0 HUB

Product information

MILAN 2.0 HUB is THE standard rescue device in the industry with additional lifting function. With the help of the hand wheel, the casualty can be lifted over a short distance to release his lanyard and lower him safely. The device is optimised for personal rescue.

Note: When working at height, a suitable rescue concept based on a risk assessment is essential. MILAN offers a wide range of applications for different rescue scenarios. To master these techniques, users must be carefully trained by a SKYLOTEC-certified instructor who has been specially trained on the device.

- THE standard rescue device
- With additional lifting function
- User weight of up to 280 kg with redirection Intuitive operation due to rope guide and brake in the housing

Material: Aluminium (anodised), steel (electrogalvanized), polyamide.

Marking: According to standard, CE-marked

Temperature range: -35°C up to 60°C

Standard: EN 341, EN 1496

Note: Rope must be ordered in desired length (not included in the price of hoist).
