

Milan 2.0 Hub & Milan 2.0 Power

Product information

General: Rescue equipment with constant descending speed which leads to a fast and safe rescue. The housing is constructed of milled aircraft aluminium which makes the product very robust. On top of that Milan 2.0 HUB & Power is equipped with a lifting function that makes it possible to move a victim a short distance, to enable release of the victims lanyard and then securely descend the victim by using the Milan rescue equipment. The rescue equipment can be handled electronically by using approved electronic lifting gear (sold separately).

Suspension element: Coated core rope 9 mm.

Max Service life: 20 Years

Material: Aluminium (anodised), steel (electrogalvanized), polyamide.

Marking: According to standard, CE-marked

Temperature range: -35°C to +60°C.

Standard: EN 341 + EN 1496

Note: Rope must be ordered in desired length (not included in the price of hoist).
