Vertical Rail Fall Arrest System Skylotec SKYTAC

Product information

SKYTAC is a vertical rail fall arrest system designed to protect workers climbing fixed ladders and elevated structures. Compatible with SPEED and SPEED ATTACH fall arrest runners, the system provides guided fall protection during vertical access. It can also be retrofitted to existing ladders, making it suitable for upgrading fall protection installations.

Best used for:

- Vertical access on masts, towers, chimneys, bridge piers and elevated tanks.
- Fixed ladders in high-bay warehouses, shafts and existing installations requiring fall protection upgrades.

Product benefits:

- SPEED ATTACH runner features two redundant fall arrest mechanisms for additional protection.
- Speed-dependent arrest function activates fall protection in response to movement speed.
- Double guide rollers reduce friction, supporting smoother climbing and reduced physical effort.
- Steel rail construction supports fixed vertical installations and ladder retrofits
