Ferrule STS Talurit®

Product information

Ferrule for splicing of steel wire rope.

Typically carbon steel ferrules are used when corrosion, higher temperature and special dragging applications are used. This system is also an alternative to the flemish eye, this is due to the fact that you have all the benifits as above but the simplicity of a straight turnback system.

The turnback ferrule system is easy to use. It is quick, safe and has proved itself to be totally reliable. It is far more efficient than all other swaging methods on the market.
