Polished Thimble

Product information

Stainless steel wire rope thimbles are designed to support and protect wire rope eyes at termination and connection points. Manufactured from A4 stainless steel with a polished finish, they help maintain the rope eye shape and reduce direct contact wear in wire rope assemblies.

Best used for:

- Wire rope eye terminations requiring protection against bending and contact wear.
- Wire rope assemblies in environments where corrosion resistance is important.

Product benefits:

- A4 stainless steel provides corrosion resistance for demanding environments.
- Thimble profile supports rope eye shape and limits localized wear.
- Polished surface provides a smooth contact area for wire rope.
